PROFESSIONAL SUMMARY

Final-year Bachelor of Computer and Information Systems in Application Development student with hands-on experience building Android apps (Kotlin, Jetpack Compose), full-stack web apps (MERN) and .NET back ends. Experienced in team-based projects using GitHub for version control, secure API design and REST integrations. Backed by a year of remote data-capturing work, which built accuracy, discipline and self-management. Seeking a junior developer or internship role.

TECHNICAL SKILLS

Mobile	Kotlin, Jetpack Compose, MVVM, Retrofit, OkHttp, DataStore
Web (MERN)	MongoDB, Express, React (Vite), Node.js
.NET	C#, ASP.NET Core MVC, Web API, Entity Framework Core
Data and APIs	REST APIs, Supabase (Postgres), MongoDB Atlas
Tools	Git, GitHub, Android Studio, HTTPS/SSL setup, security middleware

PROJECTS

LocalMiles – Last-mile delivery management app (Android, group project)

- Built the Node.js/Express and Supabase (Postgres) back end with all endpoints working, as back-end and data lead in a team of four.
- Role-based app for dispatchers, drivers and clients, with SSO, biometrics, offline sync and real-time notifications in scope.
- Researched three competitor apps (Onfleet, Track-POD, Route4Me) for a written report.

HustleHub+ – Secure freelance marketplace (MERN, group project)

- Full-stack platform covering gigs, bookings, transaction records, income tracking and tax estimation for freelancers.
- Built with a security focus across back-end foundations, full-stack delivery and DevSecOps.

Staff Attendance and Break Management System – Afcon Industrial Equipment (ASP.NET Core, group project)

- Web app for a real client with fingerprint-based clock in/out, break tracking and an admin dashboard for reporting and audit.
- Built with ASP.NET Core MVC, C# and EF Core, with MongoDB Atlas as the database.

PulseVote – Live polling app (MERN)

- React/Vite front end and Express/Node.js back end with security middleware.
- Set up local HTTPS/SSL and separate GitHub repositories for front end and back end.

BookScout and LocalLens – Android apps (Kotlin)

- BookScout: book discovery app using the Open Library API (Jetpack Compose, MVVM, Retrofit, DataStore).
- LocalLens: location-aware news app using the World News API, FusedLocationProvider, runtime permissions, pagination and error-state handling.

EDUCATION

Bachelor of Computer and Information Systems in Application Development (BCAD) – currently in 3rd year
Cambridge A Levels

WORK EXPERIENCE

Data Capturer (full-time contract, remote) – Saiann Commodity Traders | **Aug 2024 – Aug 2025**

- Captured and maintained business records accurately while working independently from home.
- Managed my own workload and deadlines without direct supervision.

Sales Representative (part-time) – Verimark | **Feb 2024 – Apr 2024**

- Built customer relationships and presented products directly to customers.
- Developed communication and persuasion skills in a target-driven role.

PERSONAL DETAILS

ID Number: 0502285741083

Nationality: South African

Marital Status: Single

Language: English
